

A woman with dark skin and curly hair pulled back, wearing a red short-sleeved shirt and heart-shaped earrings, is holding a young child. The child is wearing a red dress with white polka dots and has small braids with red and white hair ties. They are both looking towards the camera. The background is a plain, light-colored wall.

# The Builders

Annual report 2022-2023

Through the lens of Climate change, Women Empowerment, Education Upheld and Social Justice, our team devoted their life throughout the year to positively impact lives and created a conducive space for peace and progress in Haiti.

## Our Mission

Fair World Builders (FWB) is a local based non-profit organization with a clear vision for communities in Haiti to improve their educational level, increased economic security and promote social inclusion. Our mission is to come up with solutions to tackle the pressing problems of illiteracy, poverty and social discrimination by empowering young people.

Founded in 2019, between students from different universities (State University of Haiti, University of Notre Dame d'Haiti), FWB offers the following: Young Inmates Program, Youth Entrepreneurship Program, Education Upheld Program and climate Justice Program.

Our core values include: Cohesion, Respect, Fairness, and Solidarity.

## Letter from Founder

Dear Friends and supporters,

As we enter our 4<sup>th</sup> year, FWB's commitment to come up with solutions to tackle community's pressing problems of poverty, illiteracy and social discrimination by empowering young people in Haiti continues to keep us awake at night. This would never be possible without our strong ties from partners to beneficiaries.

This year, we have worked on several projects impacting the lives of thousands of young people in different communities. From prison system to community development program, we embrace the challenges of making life better for youth in deprived situations.

As we keep in mind our vision and mission, and our commitment to turn them into action, let's enjoy this fourth edition of The Builders which highlights our achievements, projects and programs from 2022 to 2023. We are grateful for your support to our girls, youth and the communities we serve.

Sincerely!

## Youth Entrepreneurship Program

---

At the core of our actions, young people play a vital role not only because our organization is a youth-led non-profit, but also because they are the pillars of change at every corner of the country. This year, our organization worked with thousands of young people, especially women and girls to make a difference into their life.

### **Impact:**

10 000 families benefit from our actions  
250 women and girls received training about fruits processings  
150 women and girls received a Revenue Generative Activity to push their small business to the next level

## Youth Inmates Program

In a democratic society, the justice system must operate in such a way that citizens are treated equally. Equality and impartiality are the two pre-requisites for a just society. As Reinhold Niebuhr said “Man’s capacity for justice makes democracy possible, but man’s inclination to injustice makes democracy necessary”. This necessity of democracy requires the respect of human rights and an unmatched bound to rule of law.

Unfortunately, many young inmates in Haiti are caught in prisons without the ability to be heard by judge even after three to ten years. This situation undermines the basic principal of the national constitution which requires a maximum 48 hours to trial after being caught. That’s why our team supports young people in Haitian prisons to get their case heard and their sentence known.

Impact:

200 cases appeared into court

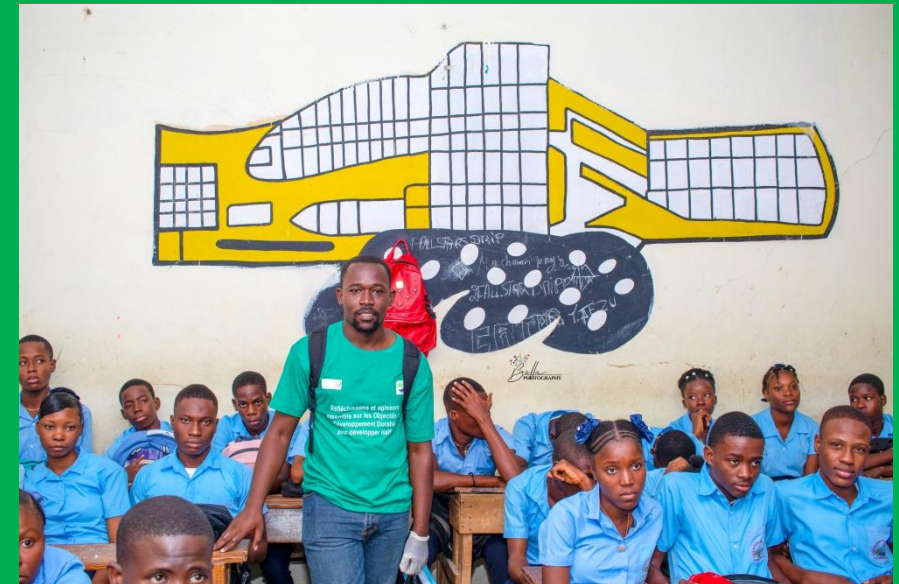

9 women and young girls supported

50 young people released

## Education Upheld Program

Quality Education is recognized worldwide as a powerful tool to individual elevation. It gives people the ability to think and make important decisions regarding their country, family and themselves. Poor education yields unequivocally poor citizens that are less productive and unable to shift the course of their country into progress.

That is why this year, our organization put forth a new plan to empower teachers and sensitize young people about the importance of education and how to make use of the New Technology so that they can boost their know-how and knowledge to the next level.

### Impact:

15 000 young people received trainings

200 professors trained

8 000 young women and girls impacted

## Climate Justice Program

As humans, the air we breathe, the food we eat and the water we drink which are most essential for our survival depend on the health of our blue planet earth. Climate change becomes the greatest Armageddon threaten our future upon it as species. The main problem is not the climate change itself because this happened long time ago, it is the pace human activities accelerated that change which causes the nightmare.

In this Anthropocene era, our organization reminds itself constantly about the place of Haiti in this uncertain time. Several reports put forth the impact of climate change upon farmers, rural communities and the country as a whole because natural catastrophes become recurrent and the country lose, each year, millions of dollars and thousands of lives be it from earthquakes, floods, cyclone...

Fair World Builders team deciphers a program related to climate justice so that it raises awareness about the issue and engage young people in this battle so that they can make their voice heard and discuss about mitigation strategy and innovation related to adaptation so that the country faces the challenges that the global warming presents.

### Impacts:

15 000 young people impact

3 universities engage in that battle

3 articles highlighting the issue published

## FWB Community

A vision and a mission cannot be achieved without the commitment of a group of people who stick to them. No matter how fascinating a vision could be, an institution must rely on other groups to achieve it. Throughout the year, our team and volunteers from all across Haiti put effort toward our common goals of upholding the educational system, raising awareness about the climate change, empowering women and girls and providing justice to those, most often, forgotten by the justice authorities.

Young people from universities, schools and professional gather to make our vision and mission moving forward by embracing the cause and sometimes put their life at risk in seeking ways to impact lives and reclaim those in dire situations: rural women and girls, farmers, youth in jail and so forth.

As Haiti is crossing a very catastrophic period of its history, young engaged people remain the most powerful weapon that keeps our organization energetic, optimistic and unshakable toward its prospective.

From our Administrative Board to our volunteers, together we have created a better Haiti by changing attitude and bringing hope to hopeless. Our administrative board of 7 members is delineated as follow:

Moselyn JEAN,  
President

Djymy LAMAR,  
CEO

Marc Abel SAMSON,  
IT Manager

Pascal C. FABIEN,  
Finance Officer

Byanka APPOLON,  
Project Coordinator

Stéphanie G. GRANDCHAMPS,  
Gender and Legal Case Officer

Sméralda VALERY,  
Logistic Officer

## Friends and Supporters of FWB

This Fiscal Year wouldn't have been possible without the huge support received from other nationals and international NGOs.

Thanks for your tremendous support and we hope that our partnership will move on years ahead.
