Our Mission

FWB (Fair World Builders) is a local based non-profit organization with a clear vision for communities in Haiti to improve their educational level, increased economic security and promote social inclusion. Our mission is to come up with solutions to tackle the pressing problems of illiteracy, poverty and social discrimination by empowering young people.

Based in Cap-Haitien and founded in 2019, with students in different universities in Haiti (State University of Haiti, Université Notre Dame d'Haïti), FWB offers the following: Young inmates program, youth empowerment program, community development program and climate change awareness program.

Our core values include Inclusion, Respect, Fairness, and

Letter from Co-Founder and COO

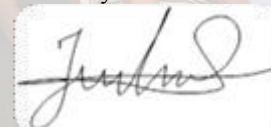

Dear Friends and supporters,

As we enter our 4th year, FWB's commitment to come up with solutions to tackle community's pressing problems of poverty, illiteracy and social discrimination by empowering the youth continues to shape our path every single day. This would never be possible without our body system from our partners to our beneficiaries.

From this year, we have worked on several projects impacting the lives of thousands of young people in different communities. From prison system to local communities, we encompass our efforts to make life better for youth in deprived communities. Every single day, our team goes for broke to create a fairer and peaceful society for every young woman and man who faces poverty, social exclusion and economic deprivation.

Even though the situation is still daunting, our team remains committed to make life easier, better and fair for millions of our young people. Please, enjoy this third edition of The Builders which highlights our achievements, projects and programs from 2021 to 2022. We are grateful for your support and hope that it will continue in the next year for the benefit of the youth and the communities we serve.

Sincerely!

Moselyn JEAN, Founder and President

What we do this year

- **Climate Program**
 - COP 26
 - Climate Advocacy with students
- **Youth Program**
 - Football race
- **COVID-19 Program**
 - Technological empowerment

Climate Program

Climate change becomes the new topic in the Anthropocene era. Media and scientific explain what is at stake for the future of humanity when it comes to the way we interact with nature. Our impact could be irreversible if nothing is done. That is why Fair World Builders continues to embrace this threat so that our country, along with other countries in the world, could face it with intelligence, and solve what needs/can be solved for the sake of everybody on our planet.

At Glasgow, our team participated in climate strike to influence decision-makers around the world to act upon this threat.

COP 26 in Glasgow

This year, with the support of the Francophone International Organization or Organisation Internationale de la Francophonie (OIF), three members of our team had the opportunity to participate at COP 26 in Glasgow. Through this conference, they have learned so many things about the climate crisis and global warming.

Climate Advocacy with students

With the support of UNDP, Fair World Builders launched the program called Student Advocacy on Climate Change. Our team went in different schools in three departments, northeast, Centre and Southeast of Haiti, so that students and professors could be aware of the issue and engage in the solution process.

Rood-Nalie PIERRE is a young student leader in environment in Henry Christophe Limonade Campus of Haiti. She put young girls together in order to explain them what is the global warming

Youth Program

This program supports young people in different fields so that they can realize their full potential.

Soccer tournament

In support with Association des Démunis (AAD) to provide technical skills to young women in north of Haiti, our organization realized a football race with the other team in order to raise money for young girls and women. These activities intend keeping young people safe and in diverting them from juvenile delinquency.

COVID-19 program

This year, as COVID-19 continues to hit millions of people in the world, our organization deployed so much effort in keeping Haitian citizens aware of its variants and their manifestation.

Youth Empowerment to tackle Fake news

With the support of Global Youth Mobilization, Fair World Builders empowered young people in northeast to light up their communities in the time of COVID-19. Through this program, 75 young people from 15 communities were empowered.

In Northeast of Haiti, Fair World Builders team worked with young people in the grassroots to make sure they know how to differentiate facts from fake news because there were many hoaxes and infox around the internet about the issue.

Through these sessions, we also realized workshops and simulation so that young leaders can go to their respective community to show the way to flatten the curve of SARS-COV-2.

Young people present their perspective after the workshops

Young people simulate COVID-19 handwashing methods
